Remedy Calculation Formula

Formula for monthly remedy of non-compliance of class size and composition language:

$V = (180 \text{ minutes}) \times (P) \times (S2+S1)$

Where:

V = **V**alue of additional compensation (in minutes) / per class

P = **P**ercentage of FTE (.286 semester ("S1" or "S2") classes; .143 linear ("FY") class)

S2 = the number of **S**tudents by which the class exceeds class composition limits

- i.e. "SpEd Total" minus 3 is greater than 0;
- if "SpEd Total" is greater than 3, see [DOC])

S1 = the highest number of **S**tudents enrolled in the class ("ClassTotal") minus the Max class size

- Max class sizes are 30, 28, 24 or 20 depending; see [DOC]
- Max class size may need to be adjusted for S2 above
    - i.e. "SpEd Total" of 1 or 2, subtract 1 from Max class size;
    - i.e. "SpEd Total" of 3, subtract 2;
    - if "SpEd Total" is greater than 3, see [DOC])
